

KWILT EXTENDS PHOTO AGGREGATION PLATFORM WITH IOS AND ANDROID SDKS, WEB API AND IOT EMBEDDED ENGINE

Now Third Party App Developers, Photo Service Providers and IoT Hardware Vendors Can Access Kwilt's Universal Photo Stream

SAN FRANCISCO – Oct. 6, 2015 – [Kwilt](#), the maker of [KwiltKeys](#) and mobile media solutions trailblazer, announced today its new iOS and Android software development kits (SDKs) along with its web API and Embedded KwiltStreamer Engine, are now available for third party app inclusion.

Kwilt's live photo streams offer users the fastest and easiest way to access and share any photo from any source to any app directly through a visual mobile interface. Photo sources include the camera roll, Instagram, Facebook, Dropbox, Flickr, Photobucket, Google+ and more.

“The availability of our technology platform SDKs, API and embedded engine will allow mobile app makers, photo finishing services and IoT device manufacturers to easily integrate Kwilt photo streams for free into their offerings,” said Marc-Antoine Benglia, Founder and CEO of Kwilt. “Photo aggregation from many sources into one stream is now a must for any app that uses consumer photos in any way, shape or form - Kwilt makes this process simple and ubiquitous!”

KEY FEATURES:

- **Mobile app developers** can now integrate consumers' massive amounts of images from several sources such as Instagram, Facebook, Google Photos, Amazon Photos and many more as one live photo stream, abstracting individual API layers with an elegant SDK architecture
- **Photo finishing services** can now easily capture consumers' photos from all sources in real time and make them instantly ready to print, reducing common photo printing struggles
- **IoT device manufacturers** can now to turn their connected home products into meaningful photo streamers that will become an integral part of consumers' digital photo ecosystem

The Kwilt SDK announcement directly follows the announcement of KwiltKeys' public launch on Sept. 21, 2015 and the announcement of Kwilt and Petzila's partnership on Sept. 23, 2015.

PRICING AND AVAILABILITY:

Kwilt iOS and Android SDKs as well as web API and Embedded Engine are immediately available for free.
